Claim Objections

Claims 6-12 and 16 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

The language "at least one of the above claims" needs to be replaced with "any one of the above claims".

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "customary" in claim 1 is a relative term which renders the claim indefinite. The term "customary" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Claims are confusing as to intent because it can not be determined what additives are intended to be included or excluded by the use of the term "customary".

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 12-16 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims to a "use" rather than a "method of using" constitute an impermissible claim to non-statutory subject matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by
DE 198 31 285.

DE-'285 discloses preparations of prepolymer compositions comprising silane terminated polyurethane prepolymers as claimed, additives and catalysts, and (fluoro) alkane and/or alkyl ether propellants as claimed as well as methods of employing these propellants in producing foams from these prepolymers (see the abstract and column 4, as well as, the entire document). As the $P_{0,w}$ values of applicants' claims relate to

properties intrinsically possessed by the propellants of the instant concern, it is held that the ranges of log $P_{O/W}$ values of applicants' claims are inherent to the teachings of DE- '285 because it discloses the propellants of applicants' claimed invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. WO 2005/035616, WO 02/066532, & Schindler et al.(7,153,923) are cited for their disclosure of interesting prepolymer compositions in the art.
